

DRCY TOOL – SCOPING MISSION

Danish Red Cross Youth do participatory and engaging assessments and scoping missions in order to understand the needs and capacities of youth and volunteers in the NS, and the communities. We have several tools to map, understand and identify for example resources, structures, challenges and opportunities.

Moreover, the scoping mission can identify how DRCY tools can support the work on youth engagement, can identify funding gaps and needs with relation to youth activities/interventions for the purpose of clarifying how DRCY can contribute to the DRC funding plan and assess the possibility for implementing a youth intervention with external funding.

As part of the scoping mission, DRCY will present preliminary findings to relevant actors during the mission, as well as prepare a report with findings and recommendations.

CASE

In 2022, DRCY did a scoping mission in Nepal. Together with youth from Nepal Red Cross Society, DRCY mapped existing youth activities and youth work done in Nepal, NRCS youth volunteer capacity needs and existing youth structures and networks in NRCS (including youth policies, by laws etc.).

The scoping resulted in recommendations to NRCS on youth engagement, relevant DRCY interventions and technical support for youth work in Nepal going forward as well as an overview of relevant funding opportunities that DRCY can apply for to support the youth work in Nepal.

About Danish Red Cross Youth

The Danish Red Cross Youth is Denmark's largest humanitarian youth organization with more than 10.000 children and young people participating in our activities. We have more than two decades of pioneering experience in developing youth engagement, implementing trainings of youth and strengthening leadership skills for young RC/RC volunteers.
